Activity F1 – Workplace IWM

While completing your practical work, answer the following questions based on the farm you are working at:

1. What are the major weed species found in the area where your place of work is located?

2. How are weeds monitored at your place of work?

3. Describe how you would collect seeds and plant material from unknown weeds observed at your place of work and how you would go about having these identified:

4. Which alien plant species are found on your farm?

5. Describe the process for clearing alien plant species on your farm:

6. Name some of the disadvantages to having weeds in your orchard:

7. Name some of the advantages of having weeds in your orchard.
8. Why is it important to keep a record of the weed monitoring data?
9. What biological control agents are used to control the major weeds at your place of work?
10. What preventative control practices are used at your place of work in the weed management programme?
11. What chemical control agents are used to control the major weeds at your place of work?
